

## MPB 4000 Traffic Lights

MPB4000 NZTA approved traffic lights are a new generation radio or cable controlled vehicle activated portable traffic lights, which are compliant to stringent NZTA COPTTM requirements.

MPB 4000 can be used to control two-way, three way (side street) and crossroads four way alternating traffic flow. Additional heads can be set up in parallel, emulating the setup we normally see at junctions where permanent traffic lights are installed.

Excellent for long term projects or worksites which require alternating flow when unattended.

### Description

- Rapid and safe single person deployment
- Easy lift electric raise or lower
- High corrosion resistance
- High solar capacity
- Low-maintenance service
- Secure extendable outriggers
- Up to 4-unit synchronisation
- Can be towed 2x up with a standard vehicle
- High gain antennae with channel hopping to eliminate cross-talk
